<i>Total Estimated Personal Living Costs</i>	<u>\$600</u>	<u>\$6,600</u>
 <i>Total Costs</i> ⁴	<u>\$910</u>	<u>\$12,010</u>

Notes:

1. Tool costs are based on the need to purchase all the minimum needed for auto mechanics - \$1375, drafting - \$125, and building construction - \$300. See tool lists, to determine which tools you already have to lower your expense.
2. Cabins are equipped with kerosene or propane lamps and accessories. Each candidate is responsible for purchasing propane and kerosene for their cabins as needed. This cost is included in the above estimate.
3. A 4-wheel drive vehicle is recommended for all candidates. The cost of operation in mountain road conditions with lower mpg, tire mileage, as well as travel during vacation times are reflected in this estimate.
4. Candidates who have been approved for training may start the program when they have secured sufficient support, based on their situation, as approved by the mission's operations and policy committee.
